***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, drawn to a first product, a plant transformed with at least one polynucleotide molecule comprising a nucleotide sequence encoding one or more constituent proteins of spindle bodies or spindle-like bodies from an insect virus.

Group II, claim(s) 9-22, drawn to a second product, a feed bait composition comprising spindle bodies or spindle-like bodies from an insect virus, or one or more constituent proteins of said bodies, and an agriculturally acceptable carrier, and a first method, of controlling or preventing damage to plants from feeding insects, comprising applying to said plant said second product.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the transformed plant of Group I is not shared with the feed bait composition or method of Group II.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
